IMAGERY ANALYSIS

December 1967

SERPUKHOV RADIOASTRONOMICAL OBSERVATORY
USSR

SUMMARY

This report identifies the major features of the Serpukhov Radio-astronomical Observatory and traces its development from [redacted] when it was still under construction. The most important facilities at the observatory are a Mills Cross antenna, a [redacted] parabolic antenna, and 2 eight-dish arrays capable of radioastronomical observations and space tracking.

IMAGERY ANALYSIS SECTION

INTRODUCTION

The Serpukhov Radioastronomical Observatory of the Lebedev Physics Institute is located at 54°50'N 37°37'E, on the south bank of the Oka River approximately 8 nautical miles southeast of Serpukhov, USSR (Figure 1).

The observatory has facilities for radioastronomical observations and space tracking. Figures 2 through 4 show the chronological development of this installation [redacted]. Table I provides the chronological development of construction by missions. The dimensions and areas of the buildings within the installation are presented in Table II.

25X1

All measurements have been made by the NRIC Technical Intelligence Division. Horizontal measurements are considered to be accurate within ± 10 feet; heights are considered approximate.

DISCUSSION

The observatory is divided into six distinct areas as shown on Figures 3 and 5.

- Area A - Housing and Support
Barracks, support buildings, and materials for construction of the installation.
- Area B - Academic Center
Academic buildings including research and classroom facilities, administration buildings, and multistory apartments.
- Area C - Unidentified Area
Two support buildings and fenced area.
- Area D - Research, Storage, and Support
Research and classroom facilities with support and storage buildings.
- Area E - Control/Instrumentation
Control/Instrumentation buildings for the antenna system, and housing.

25X1

25X1

Area F - Antenna Systems

1. [redacted] parabolic antenna
2. Mills Cross antenna - north/south arm calculated on existing base line will be 3,390 feet; east/west arm is 2,390 feet.
3. Unidentified "T-configuration" with eight-dish array at each end of the east/west arm (Figures 2 and 5).

25X1
25X1

25X1

It is significant that [redacted] the orientation of the 2 eight-dish arrays was changed from northwest/southeast to east/west. This placed the antennas at the ends of the crossarm of the unidentified "T-configuration." No reasons for justifying this change can be given. Prior [redacted] only one arm of the Mills Cross antenna had been completed. From [redacted] the Mills Cross remained relatively unchanged, thus substantiating the report that the Soviets were having difficulty with its development. 2/ When the installation was observed on photography [redacted] work on the Mills Cross had again commenced, possibly indicating that some of the developmental problems had been solved.

IMAGERY ANALYSIS SERVICE

TABLE I
LEVEL OF ACTIVITY AT THE SERPUKHOV RADIOASTRONOMICAL OBSERVATORY

25X1 Area A - [REDACTED]
Thirty-seven buildings.

25X1 [REDACTED]
Two new buildings constructed.

25X1 [REDACTED]
Minor ground scarring and new construction evident.

25X1 Area B - [REDACTED]
Twenty-three buildings.

25X1 [REDACTED]
One new building completed and unidentified new construction.

25X1 [REDACTED]
Construction continues.

25X1 [REDACTED]
Minor ground scarring and new construction evident.

25X1 Area C - [REDACTED]
One building in fenced area.

25X1 [REDACTED]
One building added.

25X1 [REDACTED]
Minor ground scarring and new construction evident.

25X1 Area D - [REDACTED]
Ten buildings and two under construction.

25X1 [REDACTED]
Two buildings completed.

25X1 [REDACTED]
One building added.

25X1 [REDACTED]
Minor ground scarring and new construction evident.

TABLE I (continued)
LEVEL OF ACTIVITY AT THE SERPUKHOV RADIOASTRONOMICAL OBSERVATORY

25X1

Area E - [redacted]
Nine control/instrumentation buildings.

25X1

[redacted]
Completed.

25X1

Area F - [redacted]
[redacted] parabolic antenna, the east/west arm of the Mills Cross,
the two eight-dish arrays, and the unidentified "T-configuration."

25X1

[redacted]
Orientation changed on 2 eight-dish arrays from northwest/southeast
to east/west. Unidentified "T-configuration" no longer visible.

25X1

[redacted]
At least one dish from each of the 2 eight-dish arrays removed.

25X1

[redacted]
Possible early stage work on the north/south arm of Mills Cross.

25X1

[redacted]
Early stage work confirmed on north/south arm of Mills Cross, but
progress is unusually slow with no significant change.
